

GIDI Round 5 Important Information Update

Abatement Cost for EECA EB1&2 – Error in calculations

Unfortunately, the Abatement Cost for EECA EB1&2 graph on page 23 of the Request for Proposals (RFP) has a minor error. The existing graph in the RFP Section 5.8.5 calculates the cost up to \$110 \$/tCO₂e, but the range should be up to \$121 \$/tCO₂e to reflect the scoring table. Please use this updated graph (and formula) below for your calculations in the Financial Assessment Template. If you have already submitted your Proposal, EECA will adjust the numbers when the Proposal is evaluated by the Technical Advisory Group.

Abatement Cost for EECA EB1&2	
Score	\$/tCO ₂ e (≥)
0	121
1	109
2	97
3	85
4	73
5	61
6	49
7	37
8	25
9	13
10	1
