

## Testing results for 2020/2021: Dishwashers

Each year EECA conducts laboratory testing to make sure manufacturers' and importers' products meet the requirements of the [Energy Efficiency \(Energy Using Products\) Regulations 2002](#).

This year, 10 models of dishwashers were tested by an accredited laboratory (as required by the Regulations).

While the washing and drying index test results are related to the products performance, they are outside the scope of energy efficiency measures. Therefore, no further testing was conducted.

The testing results are presented in the table below.
